

INFINI
PREMIUM MESO

A unique lipolytic product. Lipolysis is nothing more than non-invasive body contouring, involving the injection of active substances that cause the dissolution of fat cells. An intentional and controlled mild inflammation of the fat tissue is created at the injection site. „Swollen” cells rupture, and the fat released from them passes into the blood, with which it goes to the liver, where it is broken down and then excreted from the body. As a result, the excess accumulated tissue disappears and the circumference of the treatment area visibly decreases. The treatment is safe and requires no preparation or recovery time, and its effectiveness has been confirmed in numerous studies.

DURATION OF TREATMENTS

30 MIN

FREQUENCY OF TREATMENTS

3-5 TREATMENTS EVERY 21 DAYS

RECOVERY PERIOD

1-2 DAYS

RECOMMENDATION

MASSAGE, DRINK WATER 2L/DAY

HOW DOES IT WORK?

The formula causes immediate dissolution of fatty tissue (lipolysis). Lipolysis is nothing else but non- invasive body shaping, based on the administration of active substances that cause the dissolution of fat cells. There is an intentional and controlled slight inflammation of the adipose tissue at the injection site. „Swollen” cells burst, and the fat released from them passes into the blood, with which it goes to the liver, where it is broken down and then excreted from the body. As a result, the excess accumulated tissue disappears and the circumference of the treatment area visibly decreases. The treatment is safe and requires no preparation.

PREMIUM MESO **LipoMAX**

COMPOSITION:

Aqua, Butylene Glycol, Pentapeptide-25, Benzyl Alcohol, Sodium Hydroxide, Phosphatidylcholine, Caffeine, Carnitine, Sodium Deoxycholate, Teophylline, Polysorbate-80

BENEFITS:

- minimum number of treatments necessary to obtain satisfactory results
 - short treatment time (about 20 minutes)
 - no preparation for the procedure
 - no need for anesthesia
 - innovative composition
- high safety of the therapy resulting from the highest quality and purity of active substances
- therapy also dedicated for slim people who can't get rid of the unnecessary fatty tissue through diet or exercise
